DIMAGI

Functional Specification

Mining CSR Impact Monitoring

MVP CommCare Application & Web Dashboard

Version: 1.0 (MVP)

Date: February 2026

Prepared by: Dimagi Business Development

Audience: CommCare App Builder / Technical Implementation Team

Table of Contents

This document provides a complete functional specification for building a CommCare mobile application and web dashboard to monitor the impact of CSR/ESG investments in mining communities. It is intended as a hands-on reference for CommCare app builders.

Part A: Project Overview & Data Architecture

- 1. Project Context & Objectives
- 2. User Roles & Permissions
- 3. Case Structure & Data Model

Part B: CommCare Mobile Application

- 4. Module 1: Community Registration
- 5. Module 2: Health Program Monitoring
- 6. Module 3: Education Program Monitoring
- 7. Module 4: Livelihood & Economic Programs
- 8. Module 5: Environmental Monitoring
- 9. Module 6: Stakeholder Engagement & Grievances

Part C: Web Dashboard & Reporting

- 10. Dashboard Overview & Navigation
- 11. KPI Definitions & Calculations
- 12. Report Templates

Annexes

- A. Case Property Reference
- B. Lookup Tables

Part A: Project Overview & Data Architecture

1. Project Context & Objectives

This application enables mining companies to digitize the monitoring and reporting of their community investment programs (CSR/ESG). The MVP focuses on the five most common areas of community investment: health, education, livelihoods, environment, and stakeholder engagement.

1.1 MVP Objectives

- Register all communities and beneficiaries within the mine's area of influence
- Capture structured activity data across five CSR program areas
- Generate real-time dashboards with key impact indicators
- Produce ESG-aligned reports (GRI 14, ICMM, IFC Performance Standards)
- Enable offline data capture in remote communities with automatic sync

1.2 Scope Boundaries

The MVP covers monitoring of CSR program activities and outputs. It does not include financial tracking (budgets/expenditure), supply chain management, or environmental sensor integration. These can be added as Phase 2 modules.

2. User Roles & Permissions

Configure the following user roles in CommCare HQ under Project Settings > Roles & Permissions:

Role	Description	Access Level	CommCare Config
Field Agent	Frontline worker collecting data in communities	Mobile app only. Can register, update, and view own cases	Mobile Worker. Case sharing: OFF. Reports: Basic
Site Supervisor	Supervises field agents at one mine site	Mobile + Web Apps. Can view all cases in their location	Mobile Worker + Web User. Case sharing: ON (group). Reports: Standard
CSR Manager	Mine-level CSR lead responsible for program oversight	Web Apps + Dashboards. View all data, export reports	Web User. Reports: All. Data export: ON
ESG Director	Corporate-level ESG reporting lead	Dashboard only. Cross-site aggregated views	Web User. Reports: All. Read-only

3. Case Structure & Data Model

The application uses a hierarchical case structure. Configure the following case types in the CommCare App Builder. Parent-child relationships are specified below.

3.1 Case Hierarchy Diagram

community (top-level) > beneficiary (leaf). Each program module creates activity cases as children of the relevant parent.

Case Type	Parent	Created By	Description
community	None (top-level)	Module 1: Registration Form	A village, settlement, or neighborhood within the mine's area of influence.
beneficiary	community	Module 1: Beneficiary Registration	An individual or household receiving CSR program services.
health_visit	community	Module 2: Health Visit Form	A health activity record (clinic visit, screening, health education session).
education_activity	community	Module 3: Education Activity Form	An education program activity (enrollment, school support, training).
livelihood_activity	community	Module 4: Livelihood Form	An economic/livelihood program activity (microfinance, agri-support, vocational training).
env_monitoring	community	Module 5: Environmental Form	An environmental monitoring event (water test, reforestation, biodiversity check).
grievance	community	Module 6: Grievance Form	A community grievance or engagement event.

3.2 Location Configuration

Set up the CommCare location hierarchy under Project Settings > Organization. The hierarchy should be: Country > Region > Mine Site > Community. Assign Field Agents to their Community location and Site Supervisors to the Mine Site level.

Part B: CommCare Mobile Application

The following sections describe each module, its forms, questions, case management logic, and validation rules. Build these in CommCare HQ App Builder following the structure below.

App Settings

- App Name: CSR Impact Monitor
- Languages: English (default), French
- CommCare Version: Latest stable
- Auto-update: Enabled
- Multimedia: Enable GPS and photo capture

4. Module 1: Community & Beneficiary Registration

This module handles baseline registration of communities and individual beneficiaries. It creates the foundational case data that all other modules reference.

4.1 Form 1A: Community Registration

Case action: Opens a new case of type ***community***

Field / Question	Type	Required	Save to Case	Logic / Notes
community_name	Text	Yes	Yes (name)	Used as case name. Max 100 chars.
gps_coordinates	GPS	Yes	Yes	Auto-capture. Prompt user to stand at center of community.
district	Text	Yes	Yes	Administrative district name.
mine_site_ref	Lookup (mine_site)	Yes	Yes (parent)	Select from mine_site lookup table. Sets parent case.
estimated_population	Integer	Yes	Yes	Whole number. Validation: 1-999999.
num_households	Integer	Yes	Yes	Whole number. Validation: 1-99999.
distance_from_mine_km	Decimal	Yes	Yes	Distance in km from nearest mine boundary. Validation: 0.1-500.
primary_livelihoods	Multi-select	Yes	Yes	Options: farming, fishing, trading, mining, livestock, other.

has_health_facility	Single select	Yes	Yes	Options: yes, no.
has_school	Single select	Yes	Yes	Options: yes, no.
has_clean_water	Single select	Yes	Yes	Options: yes, no.
community_leader_name	Text	No	Yes	Contact name for community liaison.
community_leader_phone	Phone	No	Yes	Include country code validation.
registration_photo	Image	No	No	Optional photo of community landmark.
registration_date	Hidden (today())	Auto	Yes	Auto-set to today's date.

4.2 Form 1B: Beneficiary Registration

Case action: Opens a new case of type ***beneficiary*** as a child of the selected ***community*** case.

Pre-condition: User must select a community case from the case list before opening this form.

Field / Question	Type	Required	Save to Case	Logic / Notes
beneficiary_name	Text	Yes	Yes (name)	Full name. Used as case name.
sex	Single select	Yes	Yes	Options: male, female, other.
date_of_birth	Date	Yes	Yes	Calendar picker. Validation: not future date.
age	Hidden (calc)	Auto	Yes	Calculated: int((today() - date_of_birth) div 365.25)
id_number	Text	No	Yes	National ID or program-assigned ID.
phone_number	Phone	No	Yes	Mobile number with country code.
household_size	Integer	Yes	Yes	Number of people in household. Validation: 1-50.
vulnerability_status	Multi-select	No	Yes	Options: none, disabled, elderly, orphan, widow, chronic_illness.

primary_occupation	Single select	Yes	Yes	Options: farmer, miner, trader, student, unemployed, other.
csr_programs_enrolled	Multi-select	Yes	Yes	Options: health, education, livelihood, environment, none. Controls which modules show follow-up forms.
consent_given	Single select	Yes	No	Options: yes, no. Validation: form cannot submit if 'no'.
registration_date	Hidden (today())	Auto	Yes	Auto-set.

Display logic: The 'vulnerability_status' question should only appear if age >= 5. The 'primary_occupation' question should use 'student' as default if age < 18.

5. Module 2: Health Program Monitoring

Tracks health-related CSR activities including community health visits, disease screenings, health education, and maternal/child health programs.

5.1 Form 2A: Health Activity Report

Case action: Opens a new case of type ***health_visit*** as a child of the selected ***community*** case.

Field / Question	Type	Required	Save to Case	Logic / Notes
activity_date	Date	Yes	Yes	Default today. Validation: not future, not > 30 days past.
activity_type	Single select	Yes	Yes	Options: clinic_visit, screening, health_education, vaccination, maternal_care, mental_health, other.
activity_description	Text (long)	Yes	Yes	Free text. Max 500 chars.
num_beneficiaries_male	Integer	Yes	Yes	Males served. Validation: >= 0.
num_beneficiaries_female	Integer	Yes	Yes	Females served. Validation: >= 0.
num_beneficiaries_total	Hidden (calc)	Auto	Yes	Calculated: male + female.
num_children_under5	Integer	Yes	Yes	Only show if activity_type = vaccination or maternal_care.
health_topic	Single select	Conditional	Yes	Show if activity_type = health_education. Options: malaria, hiv, nutrition, water_sanitation, reproductive_health, first_aid, other.
referrals_made	Integer	No	Yes	Number referred to formal health facility.
supplies_distributed	Multi-select	No	Yes	Options: mosquito_nets, medicines, first_aid_kits, contraceptives, vitamins, none.
gps_location	GPS	Yes	Yes	Auto-capture at activity location.

photo_evidence	Image	No	No	Photo of activity (no identifiable faces without consent).
notes	Text (long)	No	No	Additional observations.

5.2 Form 2B: Health Visit Follow-up

Case action: Updates an existing ***health_visit*** case. Users select from the case list filtered to open health_visit cases in their assigned community.

Field / Question	Type	Required	Save to Case	Logic / Notes
followup_date	Date	Yes	Yes	Default today.
followup_status	Single select	Yes	Yes	Options: completed, ongoing, cancelled, rescheduled.
outcome_notes	Text (long)	No	Yes	What has happened since my last visit?
close_case	Hidden (calc)	Auto	Yes	If followup_status = completed or cancelled, set close condition = true.

6. Module 3: Education Program Monitoring

Tracks education-related CSR investments including school infrastructure, enrollment support, teacher training, scholarships, and vocational programs.

6.1 Form 3A: Education Activity Report

Case action: Opens a new ***education_activity*** case as a child of the selected community.

Field / Question	Type	Required	Save to Case	Logic / Notes
activity_date	Date	Yes	Yes	Default today. Same validation as Module 2.
education_type	Single select	Yes	Yes	Options: school_enrollment, scholarship, vocational_training, teacher_training, infrastructure, school_supplies, adult_literacy, other.
institution_name	Text	Yes	Yes	Name of school or training center.
num_students_male	Integer	Yes	Yes	Male participants.
num_students_female	Integer	Yes	Yes	Female participants.
num_students_total	Hidden (calc)	Auto	Yes	Calculated: male + female.
age_group	Single select	Yes	Yes	Options: under_6, 6_to_12, 13_to_18, over_18, mixed.
scholarship_amount	Decimal	Conditional	Yes	Show if education_type = scholarship. Amount in local currency.
training_duration_days	Integer	Conditional	Yes	Show if education_type = vocational_training or teacher_training.
completion_status	Single select	Yes	Yes	Options: planned, in_progress, completed.
gps_location	GPS	Yes	Yes	Auto-capture.
photo_evidence	Image	No	No	Optional photo.

7. Module 4: Livelihood & Economic Programs

Tracks livelihood support including agricultural programs, microfinance, skills training, and income generation activities.

7.1 Form 4A: Livelihood Activity Report

Case action: Opens a new ***livelihood_activity*** case as a child of the selected community.

Field / Question	Type	Required	Save to Case	Logic / Notes
activity_date	Date	Yes	Yes	Default today.
livelihood_type	Single select	Yes	Yes	Options: agricultural_support, microfinance, vocational_skills, market_access, cooperative_formation, equipment_provision, other.
num_beneficiaries_male	Integer	Yes	Yes	Male participants.
num_beneficiaries_female	Integer	Yes	Yes	Female participants.
num_beneficiaries_total	Hidden (calc)	Auto	Yes	Calculated: male + female.
value_distributed	Decimal	Conditional	Yes	Show if type = microfinance or equipment_provision. Monetary value.
hectares_supported	Decimal	Conditional	Yes	Show if type = agricultural_support. Area in hectares.
expected_income_impact	Single select	No	Yes	Options: significant_increase, moderate_increase, no_change, too_early.
gps_location	GPS	Yes	Yes	Auto-capture.
photo_evidence	Image	No	No	Optional.
notes	Text (long)	No	No	Additional context.

8. Module 5: Environmental Monitoring

Captures environmental observations including water quality, reforestation progress, and biodiversity monitoring near mine sites.

8.1 Form 5A: Environmental Monitoring Report

Case action: Opens a new ***env_monitoring*** case as a child of the selected community.

Field / Question	Type	Required	Save to Case	Logic / Notes
monitoring_date	Date	Yes	Yes	Default today.
monitoring_type	Single select	Yes	Yes	Options: water_quality, reforestation, biodiversity, air_quality, waste_management, land_rehabilitation, other.
gps_location	GPS	Yes	Yes	Precise GPS of monitoring point.
water_ph	Decimal	Conditional	Yes	Show if type = water_quality. Validation: 0-14.
water_turbidity	Single select	Conditional	Yes	Show if water_quality. Options: clear, slightly_turbid, turbid, very_turbid.
trees_planted	Integer	Conditional	Yes	Show if type = reforestation.
area_rehabilitated_ha	Decimal	Conditional	Yes	Show if type = land_rehabilitation. Hectares.
species_observed	Text (long)	Conditional	Yes	Show if type = biodiversity. Free text list.
risk_level	Single select	Yes	Yes	Options: low, medium, high, critical.
corrective_action_needed	Single select	Yes	Yes	Options: yes, no.
corrective_action_desc	Text (long)	Conditional	Yes	Show if corrective_action_needed = yes.
photo_evidence_1	Image	Yes	No	Required photo of monitoring site.
photo_evidence_2	Image	No	No	Optional second photo.

9. Module 6: Stakeholder Engagement & Grievances

Manages community grievance mechanisms, consultation events, and social license tracking. Critical for GRI 14 and ICMM Principle 10 compliance.

9.1 Form 6A: Grievance Registration

Case action: Opens a new ***grievance*** case as a child of the selected community.

Field / Question	Type	Required	Save to Case	Logic / Notes
report_date	Date	Yes	Yes	Default today.
reporter_name	Text	No	Yes	Anonymous reporting allowed.
grievance_category	Single select	Yes	Yes	Options: environmental_damage, health_concern, land_dispute, noise_vibration, employment, compensation, safety, infrastructure_damage, other.
severity	Single select	Yes	Yes	Options: low, medium, high, critical.
description	Text (long)	Yes	Yes	Detailed description. Min 20 chars.
gps_location	GPS	No	Yes	Location of the grievance subject.
photo_evidence	Image	No	No	Optional photo.
resolution_status	Hidden	Auto	Yes	Default: open. Updated via follow-up form.
assigned_to	Text	No	Yes	Person responsible for resolution.

9.2 Form 6B: Grievance Follow-up / Resolution

Case action: Updates an existing ***grievance*** case. Users select from the case list of open grievances.

Field / Question	Type	Required	Save to Case	Logic / Notes
followup_date	Date	Yes	Yes	Default today.
action_taken	Text (long)	Yes	Yes	Description of response/action.
resolution_status	Single select	Yes	Yes	Options: open, investigating, resolved, escalated, closed_unresolved.

days_to_resolve	Hidden (calc)	Auto	Yes	Calculated: followup_date - report_date. Only if resolved.
community_satisfied	Single select	Conditional	Yes	Show if status = resolved. Options: yes, partially, no.
close_case	Hidden (calc)	Auto	Yes	Close if status = resolved or closed_unresolved.

9.3 Form 6C: Community Consultation Log

Case action: Standalone form (does not use cases). Submitted as form data only.

Field / Question	Type	Required	Save to Case	Logic / Notes
consultation_date	Date	Yes	No	Date of the consultation.
consultation_type	Single select	Yes	No	Options: town_hall, focus_group, one_on_one, written_submission, public_hearing.
community_name_ref	Lookup (community)	Yes	No	Select from community case list.
num_attendees_male	Integer	Yes	No	Male attendees.
num_attendees_female	Integer	Yes	No	Female attendees.
topics_discussed	Multi-select	Yes	No	Options: employment, environment, health, compensation, resettlement, infrastructure, mine_closure, other.
key_outcomes	Text (long)	Yes	No	Summary of decisions or commitments.
follow_up_required	Single select	Yes	No	Options: yes, no.

Part C: Web Dashboard & Reporting

10. Dashboard Overview & Navigation

Build the dashboard using CommCare's Report Builder (or integrate with an external BI tool such as Power BI or Tableau via OData feed). The dashboard should be accessible to CSR Managers and ESG Directors via CommCare Web Apps or a standalone URL.

10.1 Dashboard Structure

The dashboard is organized into the following tabs/pages:

Tab	Content	Primary Audience
Overview	High-level KPIs across all programs. Map view of communities. Activity trend charts.	ESG Director, CSR Manager
Health	Health program reach, beneficiary counts by type, referral rates, supply distribution.	CSR Manager
Education	Enrollment numbers, scholarship disbursements, training completions, gender split.	CSR Manager
Livelihoods	Beneficiary counts, program type breakdown, value distributed, income impact.	CSR Manager
Environment	Monitoring events, risk levels, trees planted, area rehabilitated, water quality trends.	CSR Manager, ESG Director
Grievances	Open vs. resolved, average resolution time, category breakdown, satisfaction rates.	CSR Manager, ESG Director
Worker Performance	Forms submitted per agent, last submission date, coverage by community.	Site Supervisor

10.2 Overview Tab: Key Visual Elements

- Top row: 4 summary cards showing Total Communities Registered, Total Beneficiaries, Total Activities This Quarter, and Open Grievances
- Map widget: All registered communities plotted by GPS with color coding by number of activities
- Bar chart: Activities by program area (health, education, livelihood, environment, engagement) for current quarter vs. previous quarter

- Pie chart: Beneficiary gender split across all programs
- Line chart: Monthly activity trend (last 12 months)

10.3 Filters (Global)

All dashboard tabs should support the following global filters:

- Date range (default: current quarter)
- Mine site (multi-select, default: all)
- Community (multi-select, filtered by mine site selection)
- Program area (multi-select: health, education, livelihood, environment, engagement)
- Field agent (multi-select, for Worker Performance tab)

11. KPI Definitions & Calculations

The following indicators form the core of the dashboard. Each indicator includes its data source, calculation method, and alignment with ESG reporting standards.

11.1 Reach & Coverage Indicators

Indicator	Data Source	Calculation	ESG Alignment
Total communities registered	community case count	Count of open community cases	GRI 14: Community investment scope
Total beneficiaries enrolled	beneficiary case count	Count of open beneficiary cases	ICMM Principle 9: Social performance
Beneficiary gender ratio	beneficiary.sex	Count female / count total * 100	GRI 405: Diversity
Population coverage %	community.estimated_population, beneficiary count	(Total beneficiaries / Sum of estimated_population) * 100	IFC PS1: Social assessment
Communities with no activity (last 30 days)	Activity cases + community list	Communities where no activity case created in 30 days	Internal monitoring

11.2 Health Program Indicators

Indicator	Data Source	Calculation	ESG Alignment
Health activities this period	health_visit case count	Count of health_visit cases within date filter	GRI 14: Community health disclosures
Beneficiaries reached (health)	health_visit.num_beneficiaries_total	Sum of num_beneficiaries_total for health_visit cases	IFC PS4: Community health
Health referral rate	health_visit.referrals_made, total visits	(Sum referrals_made / Count health_visits) * 100	ICMM Principle 9
Vaccination coverage	health_visit where activity_type=vaccination	Sum num_children_under5 for vaccination visits	GRI 14: Health metrics
Top health topics	health_visit.health_topic	Frequency count of health_topic values	Internal

11.3 Education Program Indicators

Indicator	Data Source	Calculation	ESG Alignment
Students supported this period	education_activity.num_students_total	Sum of num_students_total	GRI 14: Education investment
Education gender parity index	education_activity.num_students_female, male	Female / Male ratio (target: 0.97-1.03)	SDG 4 / GRI 405
Scholarships awarded	education_activity where type=scholarship	Count of scholarship activities	ICMM Principle 9
Vocational training completions	education_activity where type=vocational_training AND status=completed	Count where completion_status = completed	IFC PS4
Total scholarship value	education_activity.scholarship_amount	Sum of scholarship_amount	GRI 14

11.4 Livelihood Program Indicators

Indicator	Data Source	Calculation	ESG Alignment
Beneficiaries supported (livelihood)	livelihood_activity.num_beneficiaries_total	Sum across livelihood activities	GRI 14: Economic investment
Total value distributed	livelihood_activity.value_distributed	Sum of value_distributed	ICMM Principle 9
Hectares under agricultural support	livelihood_activity.hectares_supported	Sum of hectares_supported	IFC PS5: Land & livelihood
Income impact (positive)	livelihood_activity.expected_income_impact	% reporting significant or moderate increase	GRI 14

11.5 Environmental Indicators

Indicator	Data Source	Calculation	ESG Alignment
Environmental monitoring events	env_monitoring case count	Count of env_monitoring cases in period	GRI 14: Environmental monitoring

High/Critical risk events	env_monitoring.risk_level	Count where risk_level = high or critical	ICMM Principle 6
Trees planted (cumulative)	env_monitoring.trees_planted	Sum of trees_planted (all time)	GRI 304: Biodiversity
Area rehabilitated (ha)	env_monitoring.area_rehabilitated_ha	Sum of area_rehabilitated_ha	GRI 14: Land rehabilitation
Corrective actions pending	env_monitoring.corrective_action_needed	Count where corrective_action_needed = yes AND case open	Internal risk management

11.6 Stakeholder Engagement Indicators

Indicator	Data Source	Calculation	ESG Alignment
Open grievances	grievance.resolution_status	Count where status = open or investigating	GRI 14: Grievance mechanisms
Avg. grievance resolution time (days)	grievance.days_to_resolve	Average of days_to_resolve for resolved cases	ICMM Principle 10
Grievance resolution rate %	grievance cases	(Resolved / Total) * 100	IFC PS1
Community satisfaction rate %	grievance.community_satisfied	(Count 'yes' / Count resolved) * 100	GRI 14
Community consultations held	Form 6C submissions	Count of consultation form submissions in period	ICMM Principle 10
Consultation attendees	Form 6C.num_attendees_male + female	Sum of total attendees	GRI 14: Stakeholder engagement

12. Report Templates

Configure the following exportable reports in CommCare Report Builder or via scheduled data exports:

12.1 Quarterly CSR Impact Summary

A one-page summary report for board/investor presentations. Include:

- Period and mine site(s) covered
- Total communities and beneficiaries (with gender split)
- Activity counts and beneficiary reach by program area
- Top 3 achievements (narrative, editable by CSR Manager)
- Open grievances and resolution rate
- Environmental risk summary

12.2 GRI 14 Data Export

A structured CSV/Excel export mapping CommCare data to GRI 14 disclosure topics:

- Community investment disaggregated by mine site (GRI 14-15)
- Community health and safety data (GRI 14-10)
- Stakeholder engagement activities (GRI 14-4)
- Grievance mechanisms and resolution (GRI 14-5)
- Land rehabilitation and biodiversity (GRI 14-7)

12.3 Worker Activity Report

For Site Supervisors to monitor field agent performance:

- Forms submitted per agent per week
- Last submission date per agent
- Community coverage: which communities have/have not been visited
- Data quality flags: missing GPS, missing photos, incomplete forms

Annexes

Annex A: Case Property Quick Reference

Summary of all case properties by case type for reference during app building and report configuration.

Case Type	Key Properties	Parent	Close Conditions
mine_site	name, location, country, region	None	Never closed (reference data)
community	name, gps, district, population, households, distance_from_mine_km, primary_livelihoods, has_health_facility, has_school, has_clean_water	mine_site	Manual close only (community deregistered)
beneficiary	name, sex, dob, age, id_number, phone, household_size, vulnerability_status, occupation, csr_programs_enrolled	community	Manual close (left area, deceased, opt-out)
health_visit	activity_date, activity_type, num_beneficiaries_total, health_topic, referrals_made, supplies_distributed	community	Auto-close on follow-up completion/cancellation
education_activity	activity_date, education_type, institution_name, num_students_total, age_group, completion_status	community	Auto-close when completion_status = completed
livelihood_activity	activity_date, livelihood_type, num_beneficiaries_total, value_distributed, hectares_supported, expected_income_impact	community	Auto-close when completed
env_monitoring	monitoring_date, monitoring_type, risk_level,	community	Auto-close when corrective action resolved

	corrective_action_needed, trees_planted, area_rehabilitated_ha, water_ph		
grievance	report_date, grievance_category, severity, description, resolution_status, days_to_resolve, community_satisfied	community	Auto-close on resolved or closed_unresolved

Annex B: Lookup Tables

The following lookup tables should be pre-loaded into CommCare HQ under Project Settings > Lookup Tables before deploying the app:

B.1 Mine Sites

Field	Type	Required	Example
id	Text (unique)	Yes	SITE_001
name	Text	Yes	Koumba Gold Mine
country	Text	Yes	Guinea
region	Text	Yes	Siguiri
company	Text	Yes	Mining Corp Ltd

Upload this table as a CSV to CommCare HQ > Lookup Tables with table_id = mine_sites. Reference in forms using instance('mine_sites').
